INDEX TO VOLUME XXIX

Adam, M. E. and Sichler, J. *Bounded endomorphisms of lattices of finite height*, 1254–1263

Alellunas, R. and Jackson, D. M. *Decomposition based generating functions for sequences*, 971–1009

Allegretto, W. *A note on a comparison result for elliptic equations*, 1081–1085

Altshuler, A. *Neighborly 4-polytopes and neighborly combinatorial 3-manifolds with ten vertices*, 400–420

Apt, K. R. *Recursive embeddings of partial orderings*, 349–350

Arnold, James E., Jr. *On Steenrod's problem for cyclic p-groups*, 421–428

Ash, Avner. *On eutactic forms*, 1040–1054

Atkinson, M. D. *On rank 3 groups having* $\lambda = 0$, 845–847

Baxter, J. R. and Chacon, R. V. *Enlargement of σ-algebras and compactness of time changes*, 1055–1065

Beauregard, Raymond A. *An analog of Nagata's theorem for modular* LCM *domains*, 307–314

Benabdallah, Khalid et Bradley, Robert. *Sur les groupes quasi-purs-projectifs torsions*, 107–110

Benabdallah, Khalid and Laroche, Adele. *Quasi-p-pure-injective groups*, 578–586

Berman, Gerald. *The dichromate and orientations of a graph*, 947–956

Bernstein, Leon. *Gaining units from units*, 93–106

Beynon, W. M. *On rational subdivisions of polyhedra with rational vertices*, 238–242

Beynon, W. M. *Applications of duality in the theory of finitely generated lattice-abelian groups*, 243–254

Bezak, Nicholas J. and Eisen, Martin. *Continuity properties of operator spectra*, 429–437

Boisen, Monte B., Jr. and Sheldon, Philip B. CPI-*extensions: Overrings of integral domains with special prime spectrums*, 722–737

Bonar, D. D.; Carroll, F. W. and Colwell, Peter. *Category results for Tsuji functions*, 552–558

Botto Mura, R. T. and Rhemtulla, A. H. *A class of right-orderable groups*, 648–654

Bradley, Robert et Benabdallah, Khalid. *Sur les groupes quasi-purs-projectifs torsions*, 107–110

Brown, Arlen and Pearcy, Carl. *Jordan loops and decompositions of operators*, 1112–1119

Bruen, A. A. *Some new replaceable translation nets*, 225–227

Burbea, Jacob. *The Caratheodory metric and its majorant metrics*, 771–780

Butler, G. J. *The existence of continuable solutions of a second order differential equation*, 472–479

Butzer, P. L.; Dyckhoff, H.; Görlich, E. and Stens, R. L. *Best trigonometric approximation, fractional order derivatives and Lipschitz classes*, 781–793

Carroll, F. W.; Bonar, D. D. and Colwell, Peter. *Category results for Tsuji functions*, 552–558

Cassaza, P. G.; Kottman, C. A. and Lin, Bor-Luh. *On some classes of primary Banach spaces*, 856–873

Chacon, R. V. and Baxter, J. R. *Enlargement of σ-algebras and compactness of time changes*, 1055–1065

Chattopadhyay, K. C. and Thron, W. J. *Extensions of closure spaces*, 1277–1286

Choe, T. H. and Hong, Y. H. *Extensive subcategories in universal topological algebras*, 71–76

Choi, Man-Duen and Effros, Edward G. *Lifting problems and the cohomology of* C^**-algebras*, 1092–1111

Chuchel, John and Eggert, Norman. *The complete quotient ring of images of semilocal Prüfer domains*, 914–927

Clarke, Frank H. *Inequality constraints in the calculus of variations*, 528–540
Cohen, David Mordecai. *Witt's theorem for quadratic forms over non-dyadic discrete valuation rings*, 928–936
Colwell, Peter; Bonar, D. D. and Carroll, F. W. *Category results for Tsuji functions*, 552–558
Connett, William C. and Schwartz, Alan L. *A failure of stability under complex interpolation*, 1167–1170
Conway, John B. *On the Calkin algebra and the covering homotopy property*, II, 210–215
Cressman, R. *Quantization and group representations*, 1264–1276

Davey, Brian A. *Weak injectivity and congruence extension in congruence-distributive equational classes*, 449–459
Davis, Gary and Fox, Colin D. *Compatible tight Riesz orders on the group of automorphisms of an 0-2-homogeneous set: Addendum*, 664–665
Davis, Philip J. *Cyclic transformations of polygons and the generalized inverse*, 756–770
del Junco, Andrés. *A transformation with simple spectrum which is not rank one*, 655–663
Dence, Thomas P. *A Lebesgue decomposition for vector valued additive set functions defined on a lattice*, 295–298
de Temple, Duane W. and Oulton, David B. *Formulas for the Nehari coefficients of bounded univalent functions*, 587–605
Devenny, James K. and Mordeson, John N. *Subfields and invariants of inseparable field extensions*, 1304–1311
Diaconis, Persi. *Examples for the theory of infinite iteration of summability methods*, 489–497
Divinsky, N. and Sulinski, A. *Radical pairs*, 1086–1091
Dixon, John D. *Rigid embedding of simple groups in the general linear group*, 384–391
Djoković, Dragomir Ž. *Isomorphism of some simple 2-graded Lie algebras*, 289–294
Djoković, D. Ž. and Malzan, J. *Irreducible automorphisms of certain p-groups*, 333–348
Dobbs, David E. *On characterizing injective sheaves*, 1031–1039
Drewnowski, L. *The weak basis theorem fails in non-locally convex F-spaces*, 1069–1071
Drury, S. W. *Changes of variables preserving Fourier-Stieltjes transforms on simply connected nilpotent Lie groups*, 744–755
Dyckhoff, H.; Görlich, E.; Stens, R. L. and Butzer, P. L. *Best trigonometric approximation, fractional order derivatives and Lipschitz classes*, 781–793

Effros, Edward G. and Choi, Man-Duen. *Lifting problems and the cohomology of C*-algebras*, 1092–1111
Eggert, Norman and Chuchel, John. *The complete quotient ring of images of semilocal Prüfer domains*, 914–927
Eisen, Martin and Bezak, Nicholas J. *Continuity properties of operator spectra*, 429–437
Ellers, Erich W. *Bireflectionality in classical groups*, 1157–1162

Farzan, M. and Waller, D. A. *Kronecker products and local joins of graphs*, 255–269
Fawcett, Barry. *A canonical factorization for graph homomorphisms*, 738–743
Feintuch, Avraham. *On reflexive compact operators*, 460–465
Fine, Benjamin. *Sum of squares rings*, 155–160
Fischer, Arthur E. and Marsden, Jerrold E. *The manifold of conformally equivalent metrics*, 193–209
Fischer, Pal and Holbrook, John A. R. *Matrices doubly stochastic by blocks*, 559–577
Fischer, Pal et Holbrook, John A. R. *Matrices sous-stochastiques et fonctions convexes*, 631–637
Foldes, Stephane and Hammer, Peter L. *Split graphs having Dilworth number two*, 666–672
Fox, Colin D. and Davis, Gary. *Compatible tight Riesz orders on the group of automorphisms of an 0-2-homogeneous set: Addendum*, 664–665
Frankfurt, Richard. *Quasicyclic subnormal semigroups*, 1230–1246
Freud, G. and Sharma, A. *Some good sequences of interpolatory polynomials: Addendum*, 1163–1166
Fulton, John D. *Representations by Hermitian forms in a finite field of characteristic two*, 169–179

Furuta, Takayuki. *Relations between generalized growth conditions and several classes of convexoid operators*, 1019–1030
Gauthier, P. M. and Hengartner, W. *Complex approximation and simultaneous interpolation on closed sets*, 701–706
Gilman, Robert. *Finite quotients of the automorphism group of a free group*, 541–551
Goodaire, E. G. *Algebras with a diagonable subspace whose centralizer satisfies a polynomial identity*, 277–283
Görlich, E.; Stens, R. L.; Butzer, P. L. and Dyckhoff, H. *Best trigonometric approximation, fractional order derivatives and Lipschitz classes*, 781–793
Gruenhage, Gary. *A note on quasi-metrizability*, 360–366

Hammer, Peter L. and Foldes, Stephane. *Split graphs having Dilworth number two*, 666–672
Hansen, Lowell J. *On the growth of entire functions bounded on large sets*, 1287–1291
Harris, Douglas. *Filter adjunction of spaces and compactifications*, 1141–1145
Hartley, Richard and Murasugi, Kunio. *Covering linkage invariants*, 1312–1339
Hayden, John L. and Winter, David L. *Finite groups admitting an automorphism trivial on a Sylow 2-subgroup*, 889–896
Heath, Philip R. *Homotopy equivalence of a cofibre fibre composite*, 1152–1156
Hengartner, W. and Gauthier, P. M. *Complex approximation and simultaneous interpolation on closed sets*, 701–706
Hirschorn, Ronald M. *Curves in homogeneous spaces*, 77–83
Holbrook, John A. R. and Fischer, Pal. *Matrices doubly stochastic by blocks*, 559–577
Holbrook, John A. R. et Fischer, Pal. *Matrices sous-stochastiques et fonctions convexes*, 631–637
Hong, Y. H. and Choe, T. H. *Extensive subcategories in universal topological algebras*, 71–76
Hung, H. H. *A contribution to the theory of metrization*, 1146–1151
Husain, T. and Liang, J. *Multiplicative functionals on Fréchet algebras with bases*, 270–276
Husch, L. S. *Approximating approximate fibrations by fibrations*, 897–913

Ismail, Mourad E. H. *Integral representations and complete monotonicity of various quotients of Bessel functions*, 1198–1207

Jackson, D. M. and Aleliunas, R. *Decomposition based generating functions for sequences*, 971–1009
Jeffries, Clark; Klee, Victor and van den Driessche, Pauline. *When is a matrix sign stable?*, 315–326
Jockusch, Carl G., Jr. *Simple proofs of some theorems on high degrees of unsolvability*, 1072–1080
Johnson, Nancy. *Rice theorems for $\sum_n^{-1}$ sets*, 794–805

Kelly, David. *The 3-irreducible partially ordered sets*, 367–383
Khurana, Surjit Singh. *Strict topology on paracompact locally compact spaces*, 216–219
Klee, Victor; van den Driessche, Pauline and Jeffries, Clark. *When is a matrix sign stable?*, 315–326
Kohli, J. K. *Local topological properties of maps and open extensions of maps*, 1121–1128
Kottman, C. A.; Lin, Bor-Luh and Casazza, P. G. *On some classes of primary Banach spaces*, 856–873
Krause, Günter and Teply, Mark L. *The transfer of the Krull dimension and the Gabriel dimension to subidealizers*, 874–888
Kuan, Wei-Eihn. *An addendum to ideals and higher derivations in commutative rings*, 65–70
Kubota, K. K. *On a transcendence problem of K. Mahler*, 638–647

Lada, Thomas. *An operad action on infinite loop space multiplication*, 1208–1216
Lane, Norman D.; Scherk, Peter and Turgeon, Jean M. *Quasigraphs*, 1–28
Langlands, R. P. *Shimura varieties and the Selberg trace formula*, 1292–1299
Laroche, Adele and Benabdallah, Khalid. *Quasi-p-pure-injective groups*, 578–586
Lester, J. A. *Cone preserving mappings for quadratic cones over arbitrary fields*, 1247–1253

Levy, Ronnie. *Almost-P-spaces*, 284–288
Liang, J. and Husain, T. *Multiplicative functionals on Fréchet algebras with bases*, 270–276
Lin, Bor-Luh; Casazza, P. G. and Kottman, C. A. *On some classes of primary Banach spaces*, 856–873
Lipsman, Ronald L. *On the unitarized adjoint representation of a semisimple Lie group*, II, 1217–1222
Little, Robert D. *Torsion elements and the classification of vector bundles*, 327–332
Loecke, Glenn R. *Norm convergence of T^n*, 1340–1344

Magill, Kenneth D., Jr. *Homomorphisms from $S(X)$ into $S(Y)$*, 615–625
Mahmoodian, Ebad. *On factors of a graph*, 438–440
Malzan, J. and Djoković, D. Ž. *Irreducible automorphisms of certain p-groups*, 333–348
Marsden, Jerrold E. and Fischer, Arthur E. *The manifold of conformally equivalent metrics*, 193–209
Marshall, M. *Some local-global principles for formally real fields*, 606–614
Martin, John R. *On a 1-dimensional planar continuum without the fixed point property*, 1300–1303
Milgram, R. James and Zvengrowski, Peter. *Even Whitehead squares are not projective*, 957–962
Mohamed, Saad and Singh, Surjeet. *Weak q-rings*, 687–695
Montesinos, José M. *Minimal plat representations of prime knots and links are not unique: Erratum*, 224
Mordeson, John N. and Deveney, James K. *Subfields and invariants of inseparable field extensions*, 1304–1311
Murasugi, Kunio and Hartley, Richard. *Covering linkage invariants*, 1312–1339
McDonald, David R. *On upcrossing probabilities*, 806–818
McKenzie, Ralph. *Automorphism groups of denumerable boolean algebras*, 466–471

Oberlin, Daniel M. *Translation-invariant operators on $L^p(G)$, $0 < p < 1$* (II), 626–630
Okoh, Frank. *Systems that are purely simple and pure injective*, 696–700
Ong, Hock. *Linear transformations on matrices: The invariance of a class of general matrix functions*, 937–946
Oulton, David B. and de Temple, Duane W. *Formulas for the Nehari coefficients of bounded univalent functions*, 587–605

Pabst, Gunther and Sherk, F. A. *Indicator sets, reguli, and a new class of spreads*, 132–154
Pearcy, Carl and Brown, Arlen. *Jordan loops and decompositions of operators*, 1112–1119
Petrich, Mario. *Certain varieties and quasi-varieties of completely regular semigroups*, 1171–1197
Pettet, Martin R. *A sufficient condition for solvability in groups admitting elementary abelian operator groups*, 848–855
Putnam, C. R. *Positive perturbations and unitary equivalence*, 161–164

Rahman, Q. I. and Schmeisser, G. *On rational approximation on the positive real axis*, 180–192
Rhemtulla, A. H. and Botto Mura, R. T. *A class of right-orderable groups*, 648–654
Rudin, Mary Ellen and Starbird, Michael. *Some examples of normal Moore spaces*, 84–92

Scherk, Peter; Turgeon, Jean M. and Lane, Norman D. *Quasigraphs*, 1–28
Schmeisser, G. and Rahman, Q. I. *On rational approximation on the positive real axis*, 180–192
Schmidt, Wolfgang M. *On the distribution modulo 1 of the sequence $an^3 + \beta n$*, 819–826
Schwartz, Alan L. and Connett, William C. *A failure of stability under complex interpolation*, 1167–1170
Sharma, A. and Freud, G. *Some good sequences of interpolatory polynomials: Addendum*, 1163–1166
Sheldon, Philip B. and Boisen, Monte B., Jr. *CPI-extensions: Overrings of integral domains with special prime spectrums*, 722–737

Sherk, F. A. and Pabst, Günther. *Indicator sets, reguli, and a new class of spreads*, 132–154
Sichler, J. and Adams, M. E. *Bounded endomorphisms of lattices of finite height*, 1254–1263
Singh, Surjeet and Mohamed, Saad. *Weak q-rings*, 687–695
Smith, Mark A. *Banach spaces that are uniformly rotund in weakly compact sets of directions*, 963–970
Stanek, Jean Chan. *A characterization of starshaped sets*, 673–680
Starbird, Michael and Rudin, Mary Ellen. *Some examples of normal Moore spaces*, 84–92
Steffens, K. *Matchings in countable graphs*, 165–168
Stephenson, Kenneth. *Certain integral inequalities which imply equimeasurability of functions*, 827–844
Stephenson, R. M., Jr. *Symmetrizable, $\mathcal{F}$-, and weakly first countable spaces*, 480–488
St. Mary, Donald F. *On transformation and oscillation of linear differential systems*, 392–399
Sulinski, A. and Divinsky, N. *Radical pairs*, 1086–1901
Suzuki, Shin'ichi. *On homeomorphisms of a 3-dimensional handlebody*, 111–124

Taylor, Walter. *Varieties obeying homotopy laws*, 498–527
Teply, Mark L. and Krause, Günter. *The transfer of the Krull dimension and the Gabriel dimension to subidealizers*, 874–888
Thron, W. J. and Chattopadhyay, K. C. *Extensions of closure spaces*, 1277–1286
Trushin, David. *A note on the representation type of pointed irreducible coalgebras and unipotent algebras*, 220–223
Turgeon, Jean M.; Lane, Norman D. and Scherk, Peter. *Quasigraphs*, 1–28
Tymchatyn, E. D. *Compactification of hereditarily locally connected spaces*, 1223–1229
Tzimbalario, J. *Lebesgue constants for cardinal $\mathcal{L}^1$-spline interpolation*, 441–448

van den Driessche, Pauline; Jeffries, Clark and Klee, Victor. *When is a matric sign stable?*, 315–326
van Mill, J. *Every Hausdorff compactification of a locally compact separable space is a GA compactification*, 125–131
Vincent, Paul A. *A topological characterization of conjugate nets*, 707–721

Wagner, Daniel H. *Semi-compactness with respect to a Euclidean cone*, 29–36
Walker, Marshall. *Homotopy pull-backs and applications to duality*, 45–64
Waller, D. A. and Farzan, M. *Kronecker products and local joins of graphs*, 255–269
Wasileski, J. S. *On Alexandroff base compactifications*, 37–44
Whitehead, Jennifer. *Residuals of the join of ascendant subgroups*, 1066–1068
Wicker, Fletcher D. *Generalized Bloch mappings in complex Hilbert space*, 299–306
Winter, David L. and Hayden, John L. *Finite groups admitting an automorphism trivial on a Sylow 2-subgroup*, 889–896
Woods, R. Grant. *Monocoreflective subcategories in general topology*, 1129–1141
Wu, Jang-Mei G. *Green's potentials with prescribed boundary values*, 681–686

Zvengrowski, Peter and Milgram, R. James. *Even Whitehead squares are not projective*, 957–962
